Office Memorandum • UNITED STATES GOVERNMENT

TO : Acting Director of Training

DATE: 10 December 1959

FROM : Plans and Policy Staff

SUBJECT: Weekly Activity Report #47

1. Warfare Manual and Films

[] told us of a [] warfare manual and three color films related to it which are in the possession of the Army Office of Special Warfare. This information was passed to the Operations School and [] has requested a look at the material. [] is having a copy of the manual reproduced and has sent a critique of the films which he suggests we obtain directly from the Army if we desire them. []

2. Management Training

When [] talked with Colonel White about the Army Management Course Bill attended, Colonel White made several comments about management training which were passed on to the Intelligence School. His interest in getting an important outsider to conduct a management course is aimed at the senior DD/S and other managerial levels which he feels our internal management training program is not equipped to handle. The kind of thing he has in mind is an internally conducted course for the type people who have been attending Harvard and other top-level schools so that we can cover this requirement in one fell swoop instead of nibbling at it over a long period of time. He wants a prestige name to conduct a one-time course for "GS-17's and 18's." While his interest is primarily directed at the Support officers, he would presumably include top managers from DD/I and DD/P as well.

3. Language Training Program

Last week we reported that Colonel White had circulated to Bob Amory and Dick Bissell OTR's paper on the language program. We also said that Amory had commented on the paper. His comments have now been obtained and forwarded to LAS. So far as we know there is no report of DD/P's reaction to the paper.
